a way that, after re-encryption, said data can be decrypted by another authorised device ("restoration device") connected to the same network.

The problem solved by these features can be defined as being that of "distributing data on a local network in such a way that said data can be accessed only by another authorised device connected to the same network".

Since none of the available documents discloses or indicates such a system, claim 1 fulfils the requirements of PCT Article 33(2) and 33(3).

2.2 CLAIMS 2-13

Claims 2-13 are dependent on claim 1 and, as such, therefore also fulfil the PCT requirements of novelty and inventive step.
